DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weth '556 alone. Weth shows a method for body treatment comprising: a sonic transducer (9) immersed in a liquid filled container (1), and inherently placing and exposing a person to acoustic waves. Although Weth does not explicitly state the range of frequencies, Weth does disclose variable frequencies via control (74), of which some frequencies would be considered "low". Limitations drawn to various distances, times, or types of diseases being treated, such limitations are considered as obvious art-recognized alternate uses or ranges which the present reference is capable of accomplishing given the fact that all of the structural limitations of the invention have been disclosed.
